

WasteIncineratorService

Intro

WasteIncineratorService is the final project assigned by Prof. [anatali](#) for the major course of Software Engineering.

Development process

We adopted a Scrum inspired development process, where the main assignment was divided in a series of sub-problems each faced during in a Sprint.

At the end of each Sprint we produced an executable version of the system covering some of the requirements.

Sprints

Sprint Name	Description	Qak	UserDoc
WIS_Sprint0	requirements analysis	sprint0.qak	 userDoc.md  userDoc.pdf
